(54) METHOD FOR PARTIALLY REMOVING FUNCTIONAL COATING FILM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for efficiently remove part of a functional coating film on the surface of a substrate.

SOLUTION: This method comprises the following steps the surface of a substrate is coated with a coating liquid containing an organic compound followed by curing to form a functional coating film on the surface, and a portion other than such a part of the coating film as to be removed is furnished with a light-shielding plate so as not to be irradiated with ultraviolet rays followed by irradiating the above part with ultraviolet rays to decompose and remove the above part of the functional coating film.

LEGAL STATUS

[Date of request for examination] 05.11.2002
 [Date of sending the examiner's decision of rejection]
 [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
 [Date of final disposal for application]
 [Patent number]
 [Date of registration]
 [Number of appeal against examiner's decision of rejection]
 [Date of requesting appeal against examiner's decision of rejection]
 [Date of extinction of right]
